

# Cracking CESR in Radiology

Many doctors move to the UK to enjoy a better work life balance. But... it comes with a price. They must work 10 times harder to gain the trust of not just their colleagues but also the Royal College and the GMC. It starts with FRCR and moves over to CESR even before you can pat yourself on the back for a job well done :(

As most of you have realised with FRCR, it was the fear of unknown which was scary, not the radiology because we all love Radiology!!

Similarly, CESR is just a channel to prove to the Royal College and GMC that you are qualified and safe to take care of their patients in a substantive consultant role, no less than UK trained candidates.

We aim to offer you the tools and confidence to achieve your **goal of CESR in Radiology** as soon as possible, helping you take a step closer towards your permanent consultant post.

*Who should attend the course?*

- CESR aspirants who want to know how and where to start.
- Doctors procrastinating starting the CESR application due to fear/misconceptions.
- People who have started the application but struggling to find the most appropriate way to complete it.

**So basically, if you are a CESR aspirant -this course is right for you!!**

We are not going to say-"You can do it!" because we know you can.

*Instead, we will focus on*

- Navigating through the SSG and curriculum for Clinical Radiology.
- How to best arrange and upload evidence to make a successful application.
- Answer personal queries about your application to give you best advice and guidance.

Moreover we have valuable tips regarding CESR for those who are yet to make a move to the UK.

You get advice and guidance from **someone who has cracked it** recently. You also get **CPD points!!**

**What are you waiting for?!! Hurry!!!**
